

Education

- Ajay Kumar Garg Engineering College** Ghaziabad, India
B.Tech - Computer Science and Engineering (GPA: 8.72) Oct 2023 – Jun 2027

Skills

- **Languages:** Java, C, JavaScript, TypeScript, HTML, CSS
- **Frontend:** ReactJS, Tailwind CSS, State Management, Zustand, TanStack Query
- **Backend:** NodeJS, ExpressJS, Spring Boot, Spring MVC, Microservices
- **Database:** PostgreSQL, MongoDB, MySQL, Redis
- **DevOps & Tools:** Docker, Git, GitHub, AWS, CI/CD, GitHub Actions, Postman
- **AWS Services:** EC2, RDS, ECR, ECS, ALB, Bastion Host, ACM, SSI, lamda, S3, NGINX
- **Authentication:** JWT, OAuth, reCAPTCHA, Rate Limiting
- **Realtime:** Kafka, RabbitMQ, MQTT, Websocket, SSE events

Experience

- Cloud Computing Cell (*Visit Site*)** Ghaziabad, India
Backend Developer Oct 2024 – Present
- **Backend Development:** Developed services using Spring Boot and MongoDB Atlas
 - **Authentication:** Implemented JWT and OTP-based authentication
 - **API Development:** Built REST APIs for frontend integration
 - **Database:** Designed NoSQL schemas for efficient data handling

- MacroCosmos Creations Pvt Ltd (*Visit Site*)** Bangalore, India
Full Stack Developer Intern Nov 2025 – May 2026
- **Full Stack:** Worked on React frontend and Node.js backend with API integration
 - **Database:** MySQL, created production DB replica, handled migrations, queries, joins, cascading, and schema updates
 - **DevOps:** Implemented CI/CD pipelines and AWS EC2 deployment using PM2 and Github Actions
 - **AI Integration:** Worked on AI modules, prompt optimization, and API key integrations
 - **Optimization:** Fixed bugs and improved performance in production systems

Projects

- **QuizApp:** Technologies: Spring Boot, MongoDB Atlas, JWT, REST APIs, Postman [GitHub Link](#) — [Demo Link](#)
Developed a secure backend for an online quiz application. Implemented JWT-based authentication with access and refresh tokens. Designed NoSQL schema for quizzes, users, and results. Built admin functionalities for quiz management and control. Ensured API performance and security through testing.
- **MyFinance:** Technologies: Spring Boot, React, PostgreSQL, JWT [GitHub Link](#) — [Demo Link](#)
Built a full-stack personal finance tracker. Implemented expense tracking with add/delete functionality. Integrated email reminders for financial management. Developed using Spring Boot backend and React frontend.
- **Scalable Backend Deployment on AWS:** Docker, ECS (Fargate), ECR, ALB, Nginx, GitHub Actions, ACM [GitHub Link](#)
Containerized a backend application using Docker and deployed it on AWS ECS (Fargate). Configured Amazon ECR for image storage and integrated CI/CD pipeline using GitHub Actions. Set up Application Load Balancer (ALB) with routing rules and health checks for high availability. Implemented auto-scaling for handling variable traffic efficiently. Configured HTTPS using AWS Certificate Manager (ACM) for secure communication. Integrated Nginx as a reverse proxy to optimize request handling and improve performance.
- **Microservices-Based Social Media Backend:** Node.js, Express.js, API Gateway, Redis, RabbitMQ, Docker, JWT, Media Service, User Service, Post Service [GitHub Link](#)
Designed and developed a scalable social media backend using a microservices architecture in Node.js. Implemented an API Gateway to handle request routing, authentication, and centralized entry management for all services. Built independent services for User Management (registration, login, profile handling), Post Management (create and fetch posts), and Media Handling (image/video uploads and storage). Enabled asynchronous inter-service communication to support event-driven workflows and decoupled service interactions.

Activities

- **Snowstorm Hackathon 2026 (Runner-Up):** Worked as a Backend Developer and secured Runner-Up position in the Snowstorm Hackathon held in February 2026. [View Certificate](#)
- **ET-AI Hackathon 2026 (Currently Round 2 running) :** Worked as a Full stack Developer collaborating with the team, integration the model realtime data transfer using the websocket. [GitHub Link](#)
- **Experience Letter/Internship Completion Certificate:** [View Certificate](#)
